Abstract In this paper work it is presented the synthesis of some trifluoroacetic acid's esters and trichloroacetic acid with 2,3-dibromo-1-propanol, n-propylic alcohol, respectively, and also acetic acid's ester with 2,3-dibromo-1-propanol.

The goal of our research was to establish the influence of halogen's percent on the fireproof properties.

Keywords: polyhalogenated esters, fireproof properties.
