

Paper: "Study of density and viscosity variation with temperature for fuels used for Diesel engine" Ovidius University Annals of Chemistry, 22(1), pp. 57-61, 2011.

Eratum:

In Table 2, the values of correlation parameters for diesel fuel are those for biodiesel and the correlation parameters for biodiesel are those for diesel fuel.

The corrected form of Table 2 is:

Table 2. Correlation parameters for density calculation

Fuel	Correlation parameters (eq.1)		Correlation coefficient (R^2)
	a	b	
Vegetable oil	-0.0007	0.9387	1
Diesel fuel	-0.0007	0.8536	1
Biodiesel	-0.0007	0.8939	1
